

Agricultural Cooperative Company

Agricultural Cooperative Company

Founded by a group of farmers from Parete (CE), SOLE is a company that has been working for over 50 years, and today it has a membership of 100 farming companies, representing a total cultivated area of around 450 hectares, a production of 17,000 tons with a turnover of 22,3 million euros. The products marketed by the cooperative come from farms in the area of the Campania plains, between the provinces of Caserta and Naples, a particularly fertile area due to its volcanic origin. The production plant at Parete is equipped with advanced systems for the processing, movement, packing and labelling of products.

A highly qualified team of agricultural experts work together with member companies to assist with the full application of integrated farming methods.

For several years SOLE has oriented its production policies towards high qualitative standards of organoleptic properties and wholesomeness.
